

Everyone breathes easier when you switch to Hydrocoat.

It's the fastest growing antifouling in America.

Hydrocoat has 75% less VOCs than solvent-based antifouling, so the air and water stay cleaner. Yet, water-based Hydrocoat is equally or more effective, longer lasting and less expensive than the best solvent-based antifouling. And it's easier to use, apply it over any other bottom paint without any preparation, there's no toxic smell and clean-up is soap and water simple. Hydrocoat makes everything easier, from painting, to clean-up, to breathing. Have you converted yet?
