HULL DEFENSE® LIMITED WARRANTY

PEACE OF MIND PROTECTION

When your bottom paint fouls prematurely and hinders performance, you could spend thousands of dollars in a short haul and fresh bottom paint. Not with Pettit Paint.

Pettit's Trinidad and Odyssey products provide exceptional antifouling protection backed by the industry's leading limited warranty.

Pettit's **HD (HULL DEFENSE) LIMITED WARRANTY** provides peace of mind protection for 18 or 24 months. If the bottom paint loses its effectiveness within the warranty time frame, you will be covered by Pettit's HD Limited Warranty.

TRINIDAD® HARD ANTIFOULING

TRINIDAD® XSR provides extreme antifouling protection in all waters and for every substrate. Trinidad XSR features a triple biocide package that prevents all growth at dock or underway and is safe on aluminum and all underwater metals. Trinidad XSR cures to a hard, durable finish that offers multi-season protection.

BLUE - 1290

GREEN - 1390

RED - 1690

BLACK - 1890

TRINIDAD® PRO is the standard by which all bottom paints are measured. It remains the longest lasting, strongest antifouling paint available. Trinidad PRO provides unprecedented resistance to all fouling. Its hard, protective coating has excellent adhesion and withstands the toughest abuse. Left in the water, it will provide years of dependable service.

BLUE - 1082FD

GREEN - 1083FD

RED - 1086FD

BLACK - 1088FD

TRINIDAD® 75 is one of the most respected names in the industry. Harnessing the power of an extremely high load of cuprous oxide to combat even the most extreme fouling conditions, Trinidad 75's durable, hard epoxy finish has excellent adhesion and, when left in the water, will provide years of dependable service. The antifoulant of choice for professional applicators everywhere.

BLUE - 1074FD

GREEN - 1073FD

RED - 1076FD

SPECIAL BLACK - 1079FD

TRINIDAD® HD provides excellent, long lasting protection, even under the toughest fouling conditions while meeting the 330 gram per liter VOC regulations. With excellent adhesion and high abrasion resistance, Trinidad HD works equally as well at the dock or underway, and is a good choice for powerboat or sailboat use in tropical and other warm waters where harsh fouling exists.

BLUE - 1271

GREEN - 1371

RED - 1671

ODYSSEY® ABLATIVE ANTIFOULING

ODYSSEY® TRITON delivers exceptional, multi-season, tri-biocide performance by combining the proven reliability of Copper Thiocyanate, the impressive strength of ECONEA®, and the versatile organic boosting biocide Zinc Omadine. This combination makes Odyssey Triton effective against all types of fouling found in the harshest of marine environments.

BLUE - 1299

GREEN - 1399

RED - 1699

BLACK - 1899

WHITE - 1199

ODYSSEY® 60 delivers exceptional, multi-season performance against fouling by offering the highest copper content in an ablative available. With significantly more copper than many competitors', Odyssey 60 offers stronger protection at a better value. Fast dry technology provides quick turnaround and increased production for all applicators.

BLUE - 1265

GREEN - 1365

RED - 1665

BLACK - 1865

ODYSSEY® HD combines controlled polishing ablative technology with a high copper content to provide a paint film strong enough to handle the tough marine environment from coast to coast. Odyssey HD is compatible over most finishes and will not build up over time, leaving running surfaces smooth and clean. Copolymer resins withstand hauling and relaunching without losing effectiveness.

HRT® - HYBRID REACTIVE TECHNOLOGY

PREMIUM HRT® multi-season high copper antifouling uses the latest technology available to create a hybrid paint film strong enough to handle the tough marine environment without building up over time. Equally effective on both power and sailboats, Premium HRT provides excellent protection without the costs associated with high-end antifoulants. Its ease of use, impressive coverage, and attractive price tag make it an excellent choice for use as a boatyard's "house paint."

BLUE - 1219

GREEN - 1319

RED - 1619

BLACK - 1819

ECO HRT® is a copper-free antifouling that uses the latest technology available to create a hybrid paint film strong enough to handle the tough marine environment without building up over time. ECO HRT's smooth, durable paint surface wears away over time, eliminating paint film build-up and the need for sanding. Its copper-free formula is safe to apply to aluminum-hulled boats. It provides excellent antifouling protection and can be hauled and relaunched without loss of effectiveness.

BLUE - 1200

BLACK - 1800

GRAY - 1300

NEPTUNE HRT® water-based antifouling uses the latest technology available to create a hybrid paint film strong enough to handle the tough marine environment. Soap and water clean-up, along with no strong solvent smell, yields a user-friendly application. Neptune HRT does not require sanding between coats, saving time and money. With low VOC it's ideal for marinas under restrictions. Neptune HRT can be used over all previously painted surfaces.

BLUE - 1243

GREEN - 1343

RED - 1643

BLACK - 1843

UNEPOXY HRT® seasonal antifouling uses the latest technology available to create a hybrid paint film strong enough to handle the tough marine environment without building up over time. It is a dependable antifouling paint formulated to provide outstanding protection at a very affordable price. Its smooth, durable finish is able to withstand beaching, trailering, and season-long abuse.

BLUE - 1211

GREEN - 1311

RED - 1611

BLACK - 1811

HYDROCOAT® TECHNOLOGY ANTIFOULING

HYDROCOAT® offers excellent multi-season protection against all types of fouling. Its innovative technology replaces the harsh solvents found in most bottom paints with water, resulting in an easier application and clean-up with no heavy solvent smell. Hydrocoat's ablative surface wears away with use, exposing fresh biocide while eliminating paint build-up and the need for sanding. Its unlimited dry time to launch allows for painting in the fall.

BLUE - 1240

GREEN - 1340

RED - 1640

BLACK - 1840

HYDROCOAT® ECO is a self-polishing, water-based ablative technology with organic ECONEA® biocide. Utilizing the highest level of metal-free ECONEA biocide available, combined with a slime fighting inhibitor for unprecedented multi-season protection, this copper-free formula is compatible over almost all bottom paints and is safe for use on all substrates including steel and aluminum.

ANTIFOULING SPEED COATINGS

BLACK WIDOW® is the slickest, fastest, ultra-smooth burnish-able racing finish available. Black Widow is easily burnish-able to a metallic "gun metal" shine. Black Widow makes an excellent paint for the bottom of any boat where speed is the number one priority, including racing sailboats and high performance offshore powerboats.

Black Widow contains four strong slickening agents: Molybdenum Disulfide, PTFE, Graphite and Silicon.

ANTIFOULING SPEED COATINGS

VIVID® offers the brightest colors, the blackest black, and the whitest white available. Hybrid technology incorporates all the benefits of ablative and hard paints in one. Its hard, smooth surface withstands trailering and is easily burnished to a high performance racing finish. Vivid resists build-up and can be hauled and relaunched without repainting. Safe for use on properly primed aluminum. When you choose a clean, bright Vivid color, you get a powerful antifouling that is, simply, as effective as it is beautiful.

Note: All swatch colors shown in this brochure are approximations of the actual paint color in the can.

EPOXY PRIMER BARRIER COAT

PETTIT PROTECT® is a heavy duty, two component epoxy coating for use where maximum resistance to fresh or salt water is required. It reduces water absorption making it an excellent choice for osmotic blister prevention and repair. Its high-solids formula allows for quicker and easier application with fewer coats necessary for effective protection. It also offers dependable corrosion protection on all underwater metals.

GRAY - 4700/4701

WHITE - 4100/4101

- ✓ Faster and easier application
- ✓ Comprehensive gelcoat blister repair/prevention
- ✓ Covers in 2 coats vs. the competition's 5-6 coats
- ✓ Exclusive low-VOC formula developed

WHAT MAKES PETTIT PROTECT DIFFERENT?

Pettit Protect uses significantly more of the waterproofing agent MICA. MICA, at the highest concentration possible, provides excellent protection from water intrusion.

HIGH CONCENTRATION OF MICA

✓ IMPENETRABLE PROTECTION

FIBERGLASS

PETTIT PROTECT

2 LAYERS OF HIGH CONCENTRATION

LOW CONCENTRATION OF MICA

UNDERWATER METAL PROTECTION

RUNNING GEAR GUARDIAN™ is designed to prevent fouling on all underwater metal running gear such as propellers, trim tabs, propeller shafts and rudder, prop struts, sail drives, strainers, bow and stern thrusters, and other underwater metal or running gear by providing incredibly effective and long-lasting protection. Even low levels of fouling on running surfaces can cause efficiency losses up to 20% for any boat.

BLACK - 1870

PROP COAT BARNACLE BARRIER® 1792 provides protection for bare metals including steel, stainless steel, cast iron, copper, bronze, galvanized steel, and lead. It forms an excellent bond to underwater metals and running gear, and inhibits corrosion on these surfaces. Prop Coat Barnacle Barrier's smooth, hard surface will self-clean in service and can be used above or below the waterline. The dried film of Prop Coat contains the highest percentage of pure Zinc.
